

Relevant Metadata Standards + 10 example objects

Name: Bak Ji Yong

Student number: 2023314052

1. Table of schema that I plan to use

Schema name	prefix	Full namespace
Dublin Core	dc	http://purl.org/dc/elements/1.1/
Schema.org Movie	schema	https://schema.org/Movie
MPEG-7	mpeg7	urn:mpeg:mpeg7:schema:2004
EBUCore	ebu	http://www.ebu.ch/metadata/ontologies/ebucore/ebucore#
MODS	mods	https://www.loc.gov/standards/mods/userguide/generalapp.html

2. Why I need these Schemas

Dublin Core:

DC provides the foundational metadata vocabulary that applies to any digital resources, because its purpose is to serve 'easy to use' and 'basic of metadata'. And it means that most of the elements such as 'dc:title', 'dc:date' and 'dc:language' already established internationally generalized meaning which surely could describe anime film too. Therefore, to make my schema firm but flexible, applying DC was inevitable.

Schema.org Movie:

Schema.org Movie (SoM) supplies film-specific properties that go beyond generic metadata. Insofar as covering 'movie' as a domain of schema, adopting SoM is essential step. Looking into its elements itself is perfect evidence of why. 'schema:director', 'schema:actor', 'schema:productionCompany', 'schema:duration', 'schema:isBasedOn' et cetera, all collectively capture the creativeness and production identities of film. And the most focusing and necessary point is 'schema:isBasedOn'; property for distinguishing original works from manga or novel adaptations. Because most of the Japanese animation film is based on manga or novel except rare cases like 『Maboroshi』(2023),

giving information about original works assist the understanding of film (and also it could make a bridge connecting to original paper works schema!). Thus, SoM is essential schema if projects handle the Japanese animation "FILM".

MPEG-7:

Mpeg-7(mpeg7) enables rich content-level description beyond simple labels. Elements such as 'mpeg7:Classification' supports structured, multi-level genre tagging simultaneously (like 'fantasy + adventure' or 'SF + teen movies'), 'mpeg7:TextAnnotation' make typing free-text synopsis possible. And 'mpeg7:KeywordAnnotation' enables storing thematic keywords for indexing and searching. Although mpeg7 is little bit hard to understand and apply because it aims for intermediate or more level, from the point of view that mpeg7 could answers the question "what is this film about" in a machine-readable way, adapting it into schema is highly helpful implementation.

EBUCore:

EBUCore covers the broadcast and distribution side of production. Like the real movie, surely animation films are made by production companies. Ghibli studio is one of the famous examples of them, and there are some others like ufotable, mappa or khara, inc. 'ebu:productionCompany', 'ebu:distributor' and 'ebu:countryOfOrigin' could capture industry structure outside of film. Because the 'animation' film making company has got its own style of painting and comparing one style to another is the interesting point that only animation can show, this schema is important both externally and internally to the film.

MODS:

MODS provides a structured bibliographic vocabulary maintained by the LoC, positioned between the complexity of MARC and the simplicity of Dublin Core. The main reason for using MODS is 'titleinfo', which helps distinguish between original, translated, abbreviated titles. And it enables clean multi-language title handling for Japanese film; Japanese, Romaji, Korean, and English titles within a single structured element. Furthermore, MODS can give more detailed and precise role assignments for the person concerned with film.

Appendix:

A list of 10 objects and short descriptions

1) The Girl Who Leapt Through Time

Release Year (Japan): 2006

Director: Mamoru Hosoda

Production Company: MADHOUSE Inc.

Genre: drama, fantasy

Short Description: Normal high school girl *Makoto* accidentally gained the ability to time travel. After that day, using that ability, her life becomes much easier and funnier than before. However, that short period of happiness dramatically overturned after she used time travel to avoid her friend, *Chiaki's* confession...

2) Look Back

Release Year (Japan): 2024

Director: Kiyotaka Oshiyama

Production Company: DURIAN Inc.

Genre: progression, drama, teen

Short Description: Fourth grader *Fujino* is famous from her friends for serializing a four-panel comic strip in the school newspaper. However, one day she hears from her teacher that *Kyomoto*, a school refusal student, also draws serialized comic strips. The two girls grow close through their passion for comics, but one day, an incident occurs that shatters everything...

3) Summer Wars

Release Year (Japan): 2009

Director: Mamoru Hosoda

Production Company: MADHOUSE Inc.

Genres: SF, fantasy, adventure, family saga

Short Description: *Kenji* is a quiet math prodigy until his crush *Natsuki* drags him to her grandmother's 90th birthday and introduces him as her (fake) fiancé. His problems multiply when he absentmindedly cracks an encrypted code sent to his inbox overnight. By morning, OZ — the global virtual network running infrastructure, satellites, and financial systems — is in chaos. And the name pointed to the start point of this catastrophe is his...

4) *A Silent Voice*

Release Year (Japan): 2016

Director: Naoko Yamada

Production Company: Kyoto Animation Co., Ltd.

Genre: melodrama, romance, teen, progression, drama

Short Description: As a kid, *Shoya* led his class relentlessly to bully *Shoko*, a deaf transfer student, until she disappeared from his life for some reason. After that he became the outcast himself being stigmatized as leader of bullying. Years later, haunted by guilt and standing at the edge of giving up entirely, he tracks her down. Not to be forgiven. Just to say sorry. Their story does not follow a tidy story of redemption, but an honest, sometimes painful look at 'how hard it is to reach someone — and to let yourself be reached.'..

5) *Night is Short, Walk on Girl*

Release Year (Japan): 2017

Director: Makoto Ueda

Production Company: Science SARU Inc.

Genre: romance, comedy, fantasy

Short Description: One unnamed girl step into Kyoto night with nothing but curiosity and a bottomless tolerance for alcohol. She drinks with strangers, bargains with the god of a used book market, gets swept into a guerrilla theatre production, and somehow keeps going. Meanwhile, her lovesick upperclassman is engineering increasingly absurd "chance encounters" to work up the nerve to confess. And the city keeps getting in the way, more madhouse but more fantastic. One magical, unhinged night...

6) *Perfect Blue*

Release Year (Japan): 1997

Director: Satoshi Kon

Production Company: Mad House Inc.

Genre: horror, mystery, thriller, suspense

Short Description: The Idol of small business *Mima* entire after her last stage to reinvent herself as an actress. But the moment she steps offstage, someone starts watching. A website documents her daily life in unsettling details which only Mima should and could know. People around her begin turning around and become indifferent. And gradually collapsing mentally, Mima herself begins losing track of where act ends and reality begins, making herself no longer trust own memories...

7) *Paprika*

Release Year (Japan): 2006

Director: Satoshi Kon

Production Company: Mad House Inc.

Genre: SF, mystery

Short Description: 'DC-MINI', a prototype device that lets therapists enter patients' dreams has been stolen. Almost simultaneously, people start dreaming of the same looping, infectious nightmare and have symptoms of neurosis and anxiety. The only one who can navigate both worlds is Paprika, a vivid dream-detective alter ego of therapist *atsuko chiba* who can operate where logic doesn't apply. A chaotic parade of reality and dreams unfolds...

8) *GHOST IN THE SHELL*

Release Year (Japan): 1995

Director: Kazunori Ito

Production Company: Kodansha, Ltd. / Bandai Visuals / MANGA ENTERTAINMENT

Genre: SF, Cyberpunk

Short Description: In 2029, Cybernetic Counterterrorism agent Major *Motoko Kusanagi* is

tracking a ghost, a hacker known only as the 'Puppet Master' who can rewrite human memories by accessing computerized brain. The closer she gets, the more the case turns inward and makes her think about 'what she is'; If consciousness can be copied, if memories can be implanted, if a soul can drift freely through a network — what exactly makes her herself? The journey to find the ghost leads her into the profound inner human world...

9) *The Disappearance of Haruhi Suzumiya*

Release Year (Japan): 2010

Director: Yasuhiro Takemoto

Production Company: Kyoto Animation Co., Ltd.

Genre: SF, romance

Short Description: A few days before Christmas, *Kyon* arrives at school to find that *Haruhi* is gone, and no one has ever heard of her. The SOS Brigade is same; the alien, the psychic, the time traveler: all vanished. The whole world has quietly turned over to ordinary, peaceful, but completely wrong. *Kyon* is the only one who has the memories of the way things were and the only decision-maker who must decide between former and current world.

10) *Princess Mononoke*

Release Year (Japan): 1997

Director: Miyazaki Hayao

Production Company: STUDIO GHIBLI

Genre: adventure, action, dark fantasy, war, drama, mystery

Short Description: Cursed by a dying infected god, young but brave warrior *Ashitaka* travels west seeking a cure, but what he finds was a war. On one side: *San*, a human girl raised by wolves who fights to protect the hometown forest and its gods. On the other: Lady *Eboshi*, who leads a thriving ironworks village and tries to conquer the forest. *Ashitaka* cannot choose a side, because both sides are right, and both are fighting for something irreplaceable...
