

Element Summary Table for AF(Anime Film) schema – brief version

No.	Element Name	Brief Definition
External Schema Elements		
1	mods:titleInfo	Structured container for the film title. Supports multiple instances for original Japanese, romanized, English, and Korean titles with type/language distinction.
2	schema:director	Identifies the general director of the anime film. A major access point in auteur-driven anime film discovery.
3	schema:isBasedOn	Identifies the source work (manga, novel, game, etc.) upon which the film is based. Essential for tracing creative lineage.
4	schema:duration	Records the theatrical runtime in ISO 8601 duration format (e.g. PT119M).
5	ebucore:hasProducer	Identifies the animation studio responsible for creating the film. Repeatable for co-productions.
6	ebucore:hasPublisher	Records the distributor responsible for theatrical, home video, or streaming distribution.
7	mpeg7:KeywordAnnotation	Thematic keywords describing motifs, plot devices, and themes. Supports multilingual keyword sets.
8	mpeg7:Classification	Multi-level classification container: genre (EBU ContentGenreCS), language, and parental guidance.
	└ ParentalGuidance	Official content rating per country, in text (ParentalRating) or numeric (MinimumAge) form.
9	dc:date	Original Japanese theatrical release date. Accepts full date (xs:date) or year only (xs:gYear).
10	dc:description	Narrative synopsis of the film's plot. Supports multilingual descriptions via xml:lang.
Homemade (AF) Elements		
11	af:voiceCast	Container listing voice actors and their character roles. Unique to animation metadata.
	└ voiceActor	Individual voice actor entry with actor/character names in English and Japanese, plus role type.
12	af:musicComposer	Identifies the composer of the film's original musical score, with English and Japanese names.
13	af:award	Records awards received, structured with year and category attributes for sorting

		and filtering.
14	af:animationStyle	Describes animation technique and visual style. The most domain-specific element in the schema.
15	af:rating	Rating of the film by major movie-associated sites; IMDB, Metacritic and Rotten Tomatoes.
